Calnex Joins AVnu Alliance

Leader in synchronization testing joins AVnu Alliance to help grow ecosystem of certified products

Beaverton, OR – November 16, 2015 – AVnu Alliance, the industry consortium driving open standards deterministic networking through certification, has added Calnex to its membership roster to help other members move their products toward the goal of AVnu Certification. Their testing solutions will give companies a benchmark to work towards as they fine-tune time synchronization and interoperability. As a Promoter member, Calnex is committed to promoting the growth of Audio Video Bridging/Time Sensitive Networking (AVB/TSN) through their timing and synchronization testing solutions.

Based in Scotland, Calnex is a leader in test and measurement solutions for synchronization and network emulation. Their tools allow companies to test and monitor the performance and reliability of their network for their applications.

"Calnex's business as a test vendor is driven by being ahead of the technology deployment. Joining AVnu Alliance allows Calnex to develop and deliver solutions to test timing and sync within the fast growing areas of industrial automation, automotive and Pro AV," said Tommy Cook, CEO of Calnex. "We look forward to a rewarding partnership with AVnu Alliance's community."

The team at Calnex recognizes that as demands in performance increase, so does the need for precise synchronization. Calnex's testing expertise and services will help AVnu Alliance members evaluate their product designs in preparation for entering certification.

"We are happy to welcome Calnex, with their deep experience in time synchronization and testing, to the community. Their tools will provide multiple benefits to the expanding AVnu-certified ecosystem" said Kevin Stanton, AVnu Alliance Chairman.

In addition to certification, Alliance members have access to compliance tools, testing plans, and test suites enabling early internal testing. Members also have the opportunity to participate in member-only plug fests, offering a unique hands-on opportunity for engineers to test connectivity and interoperability.

If you are interested in joining AVnu Alliance or finding out more, please contact administration@AVnu.org.

About AVnu Alliance

The AVnu Alliance is a community creating an interoperable ecosystem of low-latency, time-synchronized, highly reliable networked devices using open standards. AVnu creates comprehensive certification programs to ensure interoperability of networked devices. The foundational technology enables deterministic synchronized networking based on IEEE Audio Video Bridging (AVB) / Time Sensitive Networking (TSN) base standards. The Alliance, in conjunction with other complimentary standards bodies and alliances, develops complete solutions in professional AV, automotive, industrial control and consumer segments.
